EDUCATION

Bachelor of Science in Economics, Universidad del Pacífico

2021-2025

Rank: 11th out of 79 (Top 14%)

Relevant coursework: Econometrics, Causal Inference, and Machine Learning

RESEARCH INTERESTS

Applied Microeconomics and Public Policy

EXPERIENCE

Research Assistant

Jun 2026 - Present

Research Center of the Universidad del Pacífico (CIUP)

Lima, Peru

- Evaluated the impact of pension fund withdrawals on private sector credit using a Synthetic Control model.
- Built the donor pool by collecting, cleaning, and organizing macroeconomic and financial time series data.

Intern

Jan 2026 - Mar 2026

Food and Agriculture Organization of the United Nations (FAO)

Rome, Italy

- Processed household surveys from Ghana and created variables to estimate a Stochastic Frontier Analysis (SFA) model for the Hand-in-Hand Initiative.

Research Assistant

Sep 2024 - Dec 2025

Research Center of the Universidad del Pacífico (CIUP)

Lima, Peru

- Conducted a diagnostic analysis of university teaching careers in Peru to help design a compensation model for public school professors.
- Assisted in the empirical analysis of the factors driving university student dropout rates during the Covid-19 pandemic.
- Estimated the return on investment in public health using a cost-benefit analysis applied to the budget program for non-communicable diseases to treat obesity-related comorbidities.
- Contributed to a public policy report reviewing employment and informality policies ([CIES](#)).
- Supported the development of the theory of change and district prioritization for the “[Juntos por las Personas](#)” intervention by Perú Sostenible.
- Analyzed the potential impact of the Chancay megaport on surrounding districts through exploratory estimates of economic and service projections.

TEACHING EXPERIENCE

Teaching Assistant

Econometrics I - Universidad del Pacífico

2025-II

RESEARCH

[The effect of parental death on early education: evidence from the Peruvian case](#) (Undergraduate Thesis).

I investigated the causal effects of parental loss on seven educational and time-use outcomes in Peru using a staggered Difference-in-Differences model. Significant and persistent reductions were found in school enrollment and daily attendance. Evidence from the mechanism analysis indicates that these disruptions work through a combination of financial constraints and lower expectations of educational returns.

SKILLS

Programming Languages	Python (Web Scraping, API), Stata, R
Software	Word, PowerPoint, Excel
Tools	L ^A T _E X, GitHub (Version control)
Languages	Spanish, English (Advanced)
